iGarden Swim Jet M Series

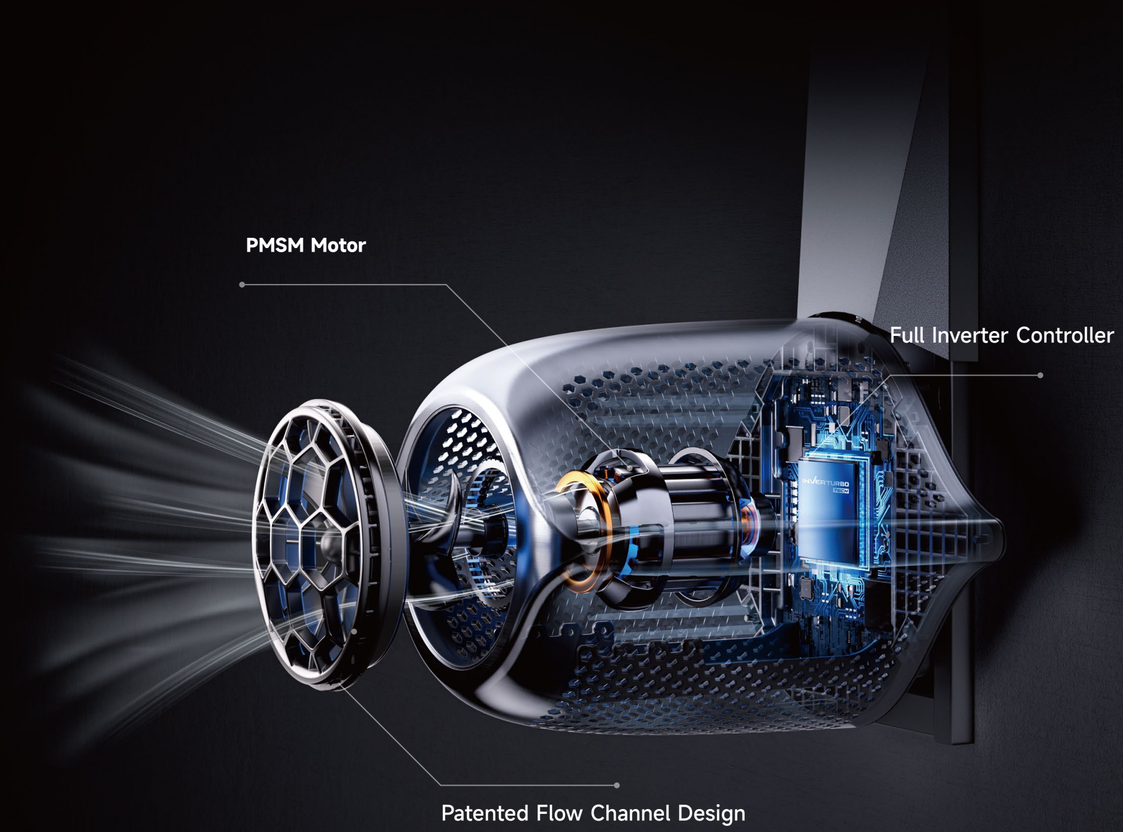

INVERTURBO TECH

With its strength of R&D and production capacity in inverter motors and electric control systems, iGarden developed innovative InverTurbo technology which combines a full inverter controller, a high-efficiency PMSM Motor, and a patented flow channel design, resulting in the iGarden Swim Jet. It not only offers the best efficiency and flow rate but also provides adjustable speed options from 20% to 100% for an unparalleled swimming experience.
